

Pavlos Vinieratos

React Native & Expo: upgrades, native modules, and mobile platform work

I wrote the tool the React Native community uses to upgrade its apps. Since 2016 I've built and led mobile at [Artsy](#), [Cointracker](#), [Sense Health](#), [Squads](#), [LeanScaper](#) and [mycujoo](#), most of them for a year or more.

WHAT I'M BROUGHT IN FOR

React Native & Expo upgrades

I created and maintain [upgrade-helper](#), the React Native core team's endorsed upgrade path, and [rn-diff-purge](#), the diff generator behind it. *monthly users or company count, if you have the analytics*

If your app is stuck several versions back, this is the problem I've solved more times than almost anyone. I take it as a fixed-fee engagement: an audit that tells you the real cost and risk before you commit, then the upgrade itself.

Native modules, when JavaScript runs out

Objective-C and Swift when the bridge isn't enough. At mycujoo I built the native modules for live video streaming in both directions, the kind of work that decides whether a React Native app can ship a feature at all.

Mobile platform and developer experience

CI/CD, release pipelines, design systems, dev-tools. The work that makes a mobile team faster every week instead of once. I led this at Artsy across every app the company shipped.

Fractional mobile lead

Team of engineers, no one senior enough to own the architecture. I've led mobile teams at five companies and can hold that seat part-time while you hire.

OPEN SOURCE

[upgrade-helper](#)

Creator and lead maintainer · 4.1k stars · 130 forks

How the React Native community upgrades its apps. 196 commits, five times the next person's, and still shipping in 2026.

[rn-diff-purge](#)

Creator and lead maintainer · 1.3k stars · 72 forks

The diff generator every upgrade-helper diff is built from. 763 commits to the next contributor's 17.

Both live under [react-native-community](#), the org the React Native core team keeps its tooling in.

SELECTED WORK

quad.codes, Founder

2024 Mar - Present

- **Are.na**: mobile app. *what shipped, and the outcome*
- **browsers.party**: the most complete browser reference on the internet.
- **md.quad.codes**: markdown publishing tool. This CV is served from it.

LeanScaper, Mobile Lead

2025 Aug - Present · Contract

- Lead the **mobile app**: a field app that lets landscape crews record huddles, raise requests and get AI-powered support, closing the gap between the field and the office. Shipped Jan 2026 and still shipping.
- Built the v2 of **leanscaper.com** with their team, the site the platform sells from.

Fuse, Mobile Engineer

2025 Feb - 2025 Oct · Contract

- Built the **Fuse app** at **Squads Labs**: Solana's first smart wallet, built on the Squads smart-account standard.
- **App of the Year** at the **inaugural Expo App Awards**, 2025, ahead of Partiful and Runna.

Cointracker, Lead Mobile Engineer

2023 Mar - 2024 Mar · Employee

- Led the mobile team and set the Expo/React Native foundation the app still runs on.
- Rebuilt transactions and wallets to full parity with the web app, the two screens that carry the product. *users, engagement or crash-rate change*
- Prototyped wallet-based login, taking crypto-native auth into the mobile app.

Artsy, Senior Software Engineer

2020 Apr - 2023 Feb · Employee · ~3 years

- Led the mobile practice group: every mobile engineer across every team, *headcount*.
- Led the mobile build of **palette-mobile**, the design system now behind Artsy's apps.
- Mobile Experience, then Mobile Platform: owned UX and developer experience across the whole mobile estate, including RN upgrades, CodePush, CI/CD, dev-tools and ML. *release cadence or build-time improvement; the strongest number available to you*
- Built Artsy's NFT auction prototype and led the internal web3 group.

Sense Health, Senior React Native Developer

2018 Nov - 2020 Apr · Employee

- Built **NiceDay**, a mental-health platform used by clinicians and patients, with a mobile team of 7 across multiple countries.
- Took a sprawling codebase and reorganised it onto modern React patterns.
- Established CI/CD (Travis, fastlane, CodePush) where there had been none.

mycujoo, Lead iOS / React Native Engineer

2016 Nov - 2018 Nov · Employee

- Built the live sports broadcasting iOS app from scratch. *streams, matches or viewers*
- Wrote the Objective-C and Swift native modules for streaming video up and down.
- Everything else in React Native, with rxjs for state, which became the subject of a **conference talk** I gave on it.

pagestrip, Senior macOS Engineer

dates · Employee

- Objective-C editor that replaced InDesign and Photoshop for publishing houses shipping daily, in print and online.
- Built the layout snapping engine, the feature the editing experience turned on.

TALKS

- **React Native EU 2020:** [Xcode complexity in React Native, and how to reduce it](#)
- **React Native EU 2019:** [Upgrading React Native projects with upgrade-helper](#)
- **React Rotterdam 2019:** [rxjs with React Native](#)

EDUCATION

M.S., Computer Science and Computer Systems

[National Kapodistrian University of Athens](#)

Thesis: managing OpenCL services with Docker containers. Teaching assistant for Systems Programming and Operating Systems across five semesters.

B.S., Computer Science

[National Kapodistrian University of Athens](#)

Thesis: a Linux USB device driver.

Currently taking new engagements. [Get in touch](#) or [book a call](#).
