

# Pavlos Vinieratos

React Native & Expo: upgrades, native modules, and mobile platform work

I wrote the tool the React Native community uses to upgrade its apps. Since 2016 I've built and led mobile at [Artsy](#), [Cointracker](#), [Sense Health](#), [Squads](#), [LeanScaper](#) and [mycujoo](#), most of them for a year or more.

## WHAT I'M BROUGHT IN FOR

---

### React Native & Expo upgrades

I created and maintain [upgrade-helper](#), the React Native core team's endorsed upgrade path, and [rn-diff-purge](#), the diff generator behind it.

If your app is stuck several versions back, this is the problem I've solved more times than almost anyone. I take it as a fixed-fee engagement: an audit that tells you the real cost and risk before you commit, then the upgrade itself.

### Native modules, when JavaScript runs out

Objective-C and Swift when the bridge isn't enough. At mycujoo I built the native modules for live video streaming in both directions, the kind of work that decides whether a React Native app can ship a feature at all.

### Mobile platform and developer experience

CI/CD, release pipelines, design systems, dev-tools. The work that makes a mobile team faster every week instead of once. I led this at Artsy across every app the company shipped.

### Fractional lead, and a multiplier

Team of engineers, no one senior enough to own the architecture. I've led mobile teams at five companies and can hold that seat part-time while you hire — the kind of hire that makes every other engineer faster.

## OPEN SOURCE

---

### [upgrade-helper](#)

Creator and maintainer · 4.1k stars

How the React Native community upgrades its apps. Started it in 2019, still maintaining it.

### [rn-diff-purge](#)

Creator and maintainer · 1.3k stars

The diff generator behind every upgrade-helper diff. Same story: started 2019, still going.

Both live under [react-native-community](#), where the React Native core team keeps its tooling.

## SELECTED WORK

---

### [quad.codes](#), Founder

2024 Mar - Present

- [Are.na](#): mobile app.

- [browsers.party](#): the most complete browser reference on the internet.
- [md.quad.codes](#): markdown publishing tool. This CV is served from it.

## LeanScaper, Mobile Lead

2025 Aug - Present · Contract

- Lead the [mobile app](#): a field app that lets landscape crews record huddles, raise requests and get AI-powered support, closing the gap between the field and the office. Shipped Jan 2026 and still shipping.
- Built the v2 of [leanscaper.com](#) with their team, the site the platform sells from.

## Fuse, Mobile Engineer

2025 Feb - 2025 Oct · Contract · 8 months

- Built the [Fuse app](#) at [Squads Labs](#): Solana's first smart wallet, built on the Squads smart-account standard.
- **App of the Year** at the [inaugural Expo App Awards](#), 2025, ahead of Partiful and Runna.

## Cointracker, Lead Mobile Engineer

2023 Mar - 2024 Mar · Employee · 1 year

- Led the mobile team and set the Expo/React Native foundation the app still runs on.
- Rebuilt transactions and wallets to full parity with the web app, the two screens that carry the product.
- Prototyped wallet-based login, taking crypto-native auth into the mobile app.

## Artsy, Senior Software Engineer

2020 Apr - 2023 Feb · Employee · ~3 years

- Led the mobile practice group: every mobile engineer across every team.
- Led the mobile build of [palette-mobile](#), the design system now behind Artsy's apps.
- Mobile Experience, then Mobile Platform: owned UX and developer experience across the whole mobile estate, including RN upgrades, CodePush, CI/CD, dev-tools and ML.
- Built Artsy's NFT auction prototype and led the internal web3 group.

## Sense Health, Senior React Native Developer

2018 Nov - 2020 Apr · Employee · ~1.5 years

- Built [NiceDay](#), a mental-health platform used by clinicians and patients, with a mobile team of 7 across multiple countries.
- Took a sprawling codebase and reorganised it onto modern React patterns.
- Established CI/CD (Travis, fastlane, CodePush) where there had been none.

## mycujoo, Lead iOS / React Native Engineer

2016 Nov - 2018 Nov · Employee · 2 years

- Built the live sports broadcasting iOS app from scratch.
- Wrote the Objective-C and Swift native modules for streaming video up and down.
- Everything else in React Native, with rxjs for state, which became the subject of a [conference talk](#) I gave on it.

## pagestrip, Senior macOS Engineer

2014 Mar - 2016 Nov · Employee · ~2.5 years

- Objective-C editor that replaced InDesign and Photoshop for publishing houses shipping daily, in print and online.
- Built the layout snapping engine, the feature the editing experience turned on.

## TALKS

---

- **React Native EU 2020:** [Xcode complexity in React Native, and how to reduce it](#)
- **React Native EU 2019:** [Upgrading React Native projects with upgrade-helper](#)
- **React Rotterdam 2019:** [rxjs with React Native](#)

## EDUCATION

---

### **M.S., Computer Science and Computer Systems**

[National Kapodistrian University of Athens](#)

Thesis: managing OpenCL services with Docker containers. Teaching assistant for Systems Programming and Operating Systems across five semesters.

### **B.S., Computer Science**

[National Kapodistrian University of Athens](#)

Thesis: a Linux USB device driver.
